

**REVISED**

## **Advanced Safety: Children's Books and other related products**

*An interactive and in depth Workshop to improve your Safety knowledge*

*A one day course aimed at Production, Designers, Publishers and Sales*

**Delivered by Diane Greaves**

Developed specifically for publishers of children's products and other novelties, this advanced level workshop is aimed at those who already have a good understanding of product safety issues and legislation. The course is ideal if you need to catch up with recent developments and is designed to build on our recently revised *Essential Safety* course.

Updates will be given on the latest changes in global Toy Safety Legislation in recognition of the fact that many products are developed simultaneously for different international markets. Other related legislation is also covered to help give you a broader perspective on a wider product range.

The day is interspersed throughout with scenarios and samples to highlight safety issues and considerations, helping you to apply the information learned in a practical way. The key safety principles of foreseeable use and risk assessment are explored and you will be provided with the skills required to identify hazards and minimise risk. Delegates are invited to bring along their own samples for discussion.

Our course tutor, Diane Greaves, has worked in the area of children's product safety for over twenty years as a test laboratory manager, hazard and risk assessor and latterly as an independent consultant to the retail and the publishing sector. Diane sits as an independent expert on several of the Standards Committees. Her technical knowledge and common sense approach enable her to deliver this often complex subject in a lively and approachable way.

- **Developments in International Toy Safety Legislation** – Toy Safety Directive • CPSIA • Canadian Hazardous Products • ISO 8124 • similarities and differences between the standards and test methods
- **Review of legislation for other product types** - Food Contact, Electrical Toy Safety (WEEE, RoHS, EN62115, Battery Regs) Cosmetics, EU Chemical legislation REACH
- **Assessing Risk** – child behaviour and learning strategies • performing a risk assessment • due diligence defence
- **Developing Safe Product** – material properties and their selection • safety processes at the factory • working with laboratories • labelling and testing for international markets
